Barbara is a Ph.D. candidate, studying Gifted Education at the University of South Florida, College of Education. Barbara will speak about a successful delivery model of gifted education and how it addresses the intersection between intellectual giftedness, the nature of the gifted profile and the needs of the gifted personality. When children are placed in the hands of a gifted program that meets their needs, they benefit from a balanced environment that nurtures their needs – academic, cognitive, emotional and social.

ABC Peel's SEAC reps from the Peel DSB and Dufferin-Peel CDSB will be available to answer questions about gifted programs available at the two school boards and give a report to parents and members.

Please register to attend. [Register here](#) or go to our website at www.abcpeel.org to access the link. While registration is not required space is limited so those who register will be admitted first.
